

## **UK EUR1 Movement Certificate**

A UK EUR1 Movement Certificate enables importers in certain countries to import goods under preference, which means your customer abroad may pay a lower or 'nil' rate of import customs duty on goods.

To claim preference the goods must 'originate' in the UK or EU and qualify under the [Rules of Origin](#).

The preference system only applies to countries where certain trade agreements exist with the UK.

## **Which countries offer preference?**

A full list of current Trade Agreements in place can be found [here](#).

## **Claiming Preference for Turkey:**

A summary of the UK Trade Agreement with Turkey can be found [here](#).

ATR's and EUR1's can no longer be issued for Turkey. A UK Certificate of Origin can be requested but will not be required to claim preference.

Again, Exporters should be aware that they can only claim preference where the goods qualify using the [Rules of Origin](#) that apply to their goods which can be found in the guidance.
